Dear Mr. Mer  
of Torva

Today, Ukraine is living in extremely difficult times, and our community is no exception. In connection with the frequent rocket attacks on the energy system of Ukraine, the residents of the community remain without light, heat, and communication for several days, especially this is reflected in the critical infrastructure, such as the hospital, water supply, heat supply of these objects.

We are asking you to help us with large power generators, that is, from 30 kW or more, to ensure critical infrastructure, we need several.

We are deeply grateful and greatly appreciate the help and support you have given us since the first days of the war.

Thank you for the joint struggle!  
Together we will win!

The major of Baranivka

Oleksandr Migey
